

PRESS RELEASE

C3 Solutions Announces Launch of New HTML5 Product Version, Introduces a Progressive Web Application to its Service

With the global phase-out of Flash sweeping the technology landscape, rendering it obsolete by 2021, C3 Solutions - the industry leader in customizable Dock and Yard Management solutions - is announcing the launch of its brand new, fully responsive HTML5 interface; which is set to provide a sleek and modern feel, and introduces a state-of-the-art progressive web application (PWA).

C3 remains the same functionality-rich, multi-platform application; but this new upgrade brings with it the option to create highly personalized screens based on the user's unique needs, increased performance, a lighter footprint on bandwidth resources, and overall improved user experience. These new features will continue to be developed upon over the course of 2020.

A client-first company, C3 set out to create the smoothest transition for its users from Flash to HTML5. With the help of their implementation experts; C3's customer care, business specialists and account managers provided comprehensive written and visual collateral to ensure an easy shift to the application's new look. C3 began transitioning clients in January 2020, and are happy to report that there have been zero operational setbacks.

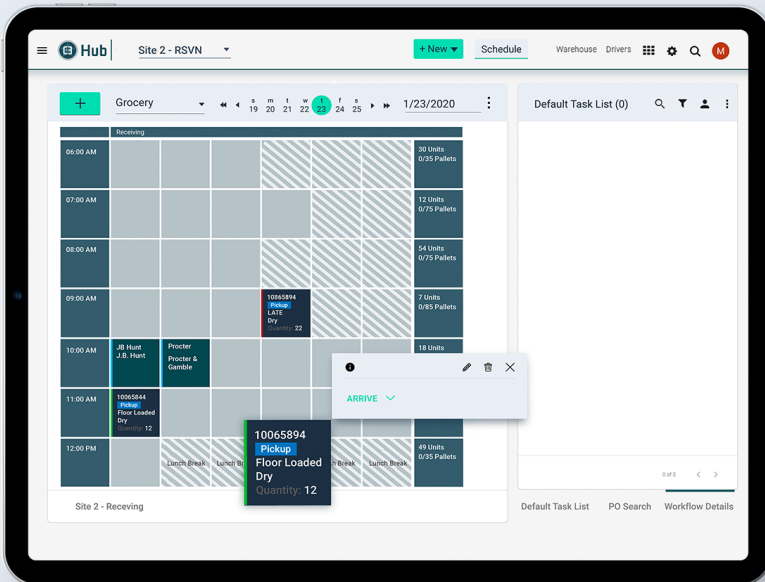

“Whenever making updates or major changes to our solutions, we have always excelled at thinking from a user's point of view first and as a software provider second. We have close working relationships with our clients and consider ourselves in-tune with their needs, and because of that, we are especially proud to release our new HTML5 platform. Our team has been working hard on the evolution of our Dock and Yard Management solutions to provide our customers with an elevated user experience. This includes a revamp of our mobile application, leaner bandwidth, and much faster loading times.”

— **Marc Tomkinson**
Vice President of Product Development

C3 is proud to continue providing **paperless**, **automated**, and **touch-free** business solutions to aid in the growing need for global environmental sustainability; and the overall health of our communities, clients, and employees.

Reservations

C3's Online **Dock Scheduling System**, streamlines the scheduling process by improving dock productivity, expanding visibility on scheduled appointments and measuring vendor compliance.
